

Does your current Bioreactor Controller deliver the competitive advantage offered by digital solutions?

Now it can...

Finesse Solutions

Introducing **TruViu™**

The newest member of the industry's most flexible bioreactor control system. TruViu™ joins TruLogic™ and TruBio™ from Finesse to deliver the competitive advantage offered by digital solutions.

Digitally Optimized to provide improved process control, increased reliability and unequaled repeatability.

Innovative Design delivers the industry's first and only automated remote gas manifold, dedicated I/O for optimum reliability and supports digital technologies of Modbus, Foundation fieldbus, DeviceNet and Profibus DP.

Best in Class OS enables improved management of control strategies, recipes, calibrations and process data on a validateable, GAMP4 compliant platform.

Contact Us To learn more about Finesse and the TruViu™, give us a call or visit us on the web. Our team of industry professionals is here to assist you.

TruViu™ is available in single or dual configuration and includes all the components necessary to operate a bioreactor.
